

5 February 1982

MEMORANDUM FOR: Deputy Chief, Near East Division/DDO

FROM : Special Assistant to the Director for Interdepartmental Affairs

SUBJECT : DCI Preparation for NSC Meeting on Libya

25X1

1. The NSC will meet at 9:30 on 10 February to discuss Libya. The Director would like you to act as the focal point for pulling together material for him for that meeting.

2. Libya was on the agenda for yesterday's NSC meeting, but it was not thoroughly discussed. I will make available to you the materials which Charlie Waterman provided the Director for that meeting. It is not clear whether additional papers will be issued by the NSC prior to Wednesday's meeting. If past practices are followed, any papers will come late in the process.

3. In addition to the materials already in hand, however, the Director would like to have the following:

- A comprehensive, detailed description of where and how Qadhafi is making trouble in Africa, the Middle East, and South Asia. This should include his efforts to export terrorism, support insurgencies, and fund activities of various countries such as Pakistani nuclear efforts, etc.
- What is our bottom line in our analysis of what makes Qadhafi tick? What is his master plan, if one exists? You should consult with [redacted] of the NIC AG, who is currently drafting a paper for the Director [redacted]

4. The Director is looking to you to be his single point of contact to pull together any and everything he needs for this meeting. He should have his material in hand by noon Tuesday, 9 February. Please provide me two copies of the package. I will put it in our standard folders for forwarding to the Director. I am available, of course, to consult with you and to help you, should you need any assistance.
